## COPPER SYSTEM RJ 45 Connectors

The **NEW TOOLLESS CONNECTORS** with toolless fast connection are available in all categories for installation both on patch panels and in the workstation. A perfect connection can be obtained in a few seconds, guaranteeing optimum performance of the link from the patch panel to the workstation. They are colour-coded so their category can be safely identified:

- Cat. 5e: grey
- Cat. 6: blue
- Cat. 6 A: yellow
- Cat. 8: aqua

PATENTED  
DESIGN

New systems to facilitate wiring and installation and increase the data transfer speed with both the copper solution and the fibre optic solution.

## New Toolless connector connection phases

1 Take the wire housing

2 Pass the cable through the back of the wire housing

3 Separate and insert the pairs

4 Cut the pairs

5 Install the wire housing without pushing

6 Push down the lever and lock the connector
